3pm to 5pm	Exploiting Digital for Depression & Dementia, HEAD (Inc Tea Break - 3.45pm to 4pm)
-------------------	--

<p>Exploiting Digital for Depression & Dementia</p> <p>This workshop is designed to help answer questions about how technology and increasingly personal technology can help support patients with mental health issues. We know that there are many tools and solutions available, however, how can we answer questions about value, efficacy and the impact on patients? This session will aim to give participants exposure to the world of digital development and the thinking that goes behind designing tools based around end-user needs. This will be followed by a break-out session with one group focusing specifically on Depression and a second group focusing on Dementia. Break-out topics will include:</p> <ul style="list-style-type: none"> • What are the clinical opportunities in this area? • Given different deployment models (personal mobile, digital in the GP & digital in clinics, hospitals etc.), how would patients need to access these solutions? • What ideas and trials could take place?
--

- How can we qualify solutions with the greatest value?

This session will be facilitated by Head, a digital products and services agency that specialise in making user-centred, accessible and valuable products. Head are working in partnership with Pearson Clinical to explore new digital services that can be brought into the market place.

5pm

Close.

Followed by Wine Reception and Networking

6.15pm

Ends.
